

High-Power RF Sensor Calibration Services

From the manufacturer of the most advanced high-power calibration systems in the world comes an improved high-power RF sensor calibration service, built on TEGAM's over 30 years of RF experience, allowing support of your customer's high-power RF workload without the high startup costs, training burden, or OEM hassles typically associated with high-power sensor calibration.

TEGAM Now Offers the Fastest Turnaround on a Premium Calibration of High-Power Sensors

The TEGAM Advantage

- 100 W Calibration at $\pm 1\%$
- Calibrated to OEM's Uncertainty Specifications
- ISO/IEC 17025-2005 Accredited Calibration
Certificate No.: 2018.01

Fastest Turnaround Time

Minimize downtime and delays with TEGAM's commitment to quick-turn high-power calibration service.

Premium Calibration

TEGAM manufactures the most advanced high-power RF calibration systems in the world, with the highest power and lowest uncertainty measurement capabilities available (see our Scope of Accreditation at www.tegam.com/accreditation-and-certification).

Built around TEGAM's flow calorimeters, our sensor calibration systems provide unparalleled calibrations for your high-power sensor workload. All calibrations are performed at 100 W with 1% measurement uncertainty and are traceable to SI units through NIST.

Higher calibration powers up to 5kW on request.

Calibration Support Options

In addition to the usual per-calibration service arrangements, TEGAM simplifies your budget planning and logistics with Extended Calibration Support Plans for single units or your entire workload.

Single Unit Plans

Our single serial number plans make it easy to coordinate and manage your calibration budget and logistics with scheduling, notices of upcoming calibration due dates, and straightforward invoicing. Plans are available for terms of 3 or 5 years.

Workload Plans

Take advantage of volume pricing discounts when you use TEGAM's calibration services for your entire workload. Workload plans are available in terms of one or more years.

Supported Sensors and Connectors¹

Models	Connectors
Bird 4021	
Bird 4022	N 7/16
Bird 4023A3G	HN 7/8
Bird 4024	LC QDS
Bird 4025	

Call today at +423 375 80 20 or email us at sales@spm.li for details about our high-power sensor calibration service, calibration support plans, and for volume pricing information.

¹ Model numbers listed above are supported by TEGAM's calibration support plans. For models not listed, please contact us for more information.
